

LED MOTORCYCLE SIGNAL LIGHT

"I've been using this light for the majority of the summer on my 78 Yamaha tracker project and I haven't had any issues whatsoever. It's super bright and easily visible from afar. As long as you install it on an oil-free surface it won't budge."

Safety is paramount when on a motorcycle, so elevate your visibility as a driver with this LED Motorcycle Signal Light. Bright red LED light illuminates "STOP" on this add-on sign to notify other motorists and drivers on the road.
