

360-DEGREE ROTATING LED NIGHT LIGHT

“These are the best night lights I've ever seen. All the LED ones I've found previously were either too dim to be helpful. The appearance is very simple and goes with any decor, and the value is unbeatable!”

From living room to bedroom or hallway, a boost of light can really make all the difference to a place. Our LED Night Light delivers motion-sensor-activated convenience for increased visibility and peace of mind anywhere you install it.
